

MANAGED IT · SECURE REMOTE ACCESS

Priority IT Support Agreement

Predictable, front-of-line support and a hardened remote-access setup for your work-from-home team.

Kelly, On-Site Computer Service has handled Legacy Landscaping's technology since **December 2011** — fourteen years of keeping your office running and stepping in fast whenever something breaks. This agreement formalizes that relationship and adds two things you've asked about: a **more secure way to work from home**, and a **predictable cost** for the support you already rely on.

Today, you and your secretary reach your office computers over Remote Desktop, protected by Duo. That works — but it leaves your computers reachable from the open internet. This agreement upgrades you to a private, encrypted **VPN tunnel**, puts your support on a flat monthly footing, and moves you to the front of the line whenever you need us.

01 What's included every month

Priority Response & Direct Line

When something's down, Legacy goes to the top of the queue, ahead of standard break-fix calls. Signed clients also get **Greg's personal cell number** for direct access when it matters.

Secure VPN Remote Access

Full setup of an encrypted VPN tunnel for both remote users, replacing exposed Remote Desktop — **included free with your 12-month agreement**. Ongoing maintenance and monitoring included too.

Covered Support Hours

Up to **2 hours** of remote support each month, included at no additional charge. Your typical month fits comfortably inside this.

Remote-First Support

With your VPN in place, most issues are diagnosed and fixed remotely — often same-day — so you're not waiting on a drive-out for routine problems.

02 The secure remote-access upgrade

Right now, Remote Desktop is reachable from the open internet and guarded by Duo. Duo is a good lock — but the **door is still visible to the entire internet**, and exposed Remote Desktop is the single most common way small businesses get broken into.

A VPN closes that door completely. You and your secretary connect through a **private, encrypted tunnel first**, and only then reach your desktops — exactly as if you were sitting in the office. **Nothing about your day-to-day changes**; you log in and work the same way. What changes is that your computers are no longer sitting out in the open where anyone can find them.

**SIGN BY
FRIDAY**

Sign before **midnight Friday, June 19** and your secure VPN will be **set up and running by end of day Monday, June 22**.

03 Choose your plan

Both are **12-month agreements** and include everything above — priority response, full VPN setup & maintenance, 2 hours of remote support each month, and discounted rates on additional work. **The only difference is how on-site trip charges are handled.**

PLAN A

Trip Charges Included

\$349.99 / month

\$4,199.88 PER YEAR

On-site visits carry **no trip charge** — ever.

Best if you expect **several on-site visits** a year.

Fully predictable — one number, nothing added for travel.

PLAN B

Trip Charges Excluded

\$299.99 / month

\$3,599.88 PER YEAR

On-site visits add a **\$120 trip charge** per visit.

Best if **most support stays remote** — which, with your VPN, it will.

Lower monthly; you only pay for travel when we actually drive out.

The two plans break even at about **five on-site visits a year** — fewer than that, Plan B costs less; more than that, Plan A wins. Since the VPN is built to keep your support remote, most months won't need a visit at all.

04 Rates beyond your included hours

Additional remote support — business hours (past the 2 included hours)	\$149 / hr
On-site service — labor	\$149 / hr
On-site trip charge — round trip to your location	\$120 (waived on Plan A)
After-hours support — after 6:00 PM	\$299 / hr
Saturday & weekend support	\$390 / hr
Hardware, equipment & replacement parts	Quoted separately

New computers and equipment are not part of either plan — those are quoted and billed separately, exactly as they are now. This agreement covers support, security, and remote access, not hardware purchases.

05 Term & acceptance

- **12-month agreement**, billed on the 1st of each month plus applicable NC sales tax. Either party may cancel at the end of the 12-month term with **30 days' notice**.
- **VPN setup & configuration is included at no charge** with the 12-month term — a one-time service that is otherwise billed at our hourly rate.
- Included remote hours do not roll over month to month.

Select your plan: | **Plan A** — Trips Included (\$349.99/mo) | **Plan B** — Trips Excluded (\$299.99/mo)
